Summary

Software Development Engineer II with experience building AI-powered SaaS platforms, distributed systems, real-time applications, and cloud-native infrastructure. Skilled in FastAPI, React, TypeScript, LangGraph, AWS, Azure, distributed processing, and scalable backend architecture.

Experience

Finarb Analytics Consulting

Kolkata, West Bengal, India

Software Development Engineer - II

Nov 2024 – Present

- Migrated **30+ PostgreSQL stored procedures** into Entity Framework Core + LINQ architecture, improving API performance by **40%**.
- Automated **test generation and Azure DevOps CI/CD workflows**, improving deployment reliability by **35%**.
- Built **production-grade multi-LLM orchestration pipelines** integrating OpenAI, Anthropic, and Gemini models with retry handling, token metering, and **LangSmith** observability.
- Developed **scalable systems** using FastAPI, AWS Lambda, API Gateway, and DynamoDB for **real-time interview intelligence platforms** supporting live transcription, collaborative notes, and transcript analytics.
- Engineered React 18/19 + TypeScript frontend systems with WebSocket synchronization, TanStack Query caching, and collaborative workflows.
- Designed **token-based billing and usage metering systems** with per-model LLM pricing, Stripe integration, and real-time usage tracking.
- Contributed to an **AI-driven email marketing automation platform** featuring workflow orchestration, AI content generation, contact enrichment, and distributed campaign execution pipelines.
- Containerized and deployed cloud-native services using Docker, Azure Container Apps, PostgreSQL, Redis, Azure Blob Storage, and Azure DevOps CI/CD pipelines.

Software Development Engineer - I

Jun 2022 – Oct 2024

- Developed scalable frontend systems using React, TypeScript, and MobX with centralized Root State architecture for enterprise **SaaS applications**.
- Built backend services using FastAPI, Celery, and PostgreSQL with **repository-pattern architecture** and asynchronous background job processing.
- Integrated Azure Data Factory APIs and Azure Blob Storage pipelines for enterprise **ETL workflows**.
- Automated cloud infrastructure provisioning using Terraform across Azure environments.
- Played a pivotal role in a **pharma-based client project**, focusing on API development and transformation queries within Databricks, contributing to critical data handling and transformation for enhanced client outcomes.
- Developed **internal scaffolding systems** for React and FastAPI applications, reducing development timelines by **15%**.

Software Consultant

Remote

Full Stack & E-Commerce Engineer

Aug 2025 – Dec 2025

- Developed scalable Shopify based e-commerce platforms for businesses with third-party integrations.
- Engineered a full-stack social media platform featuring real-time messaging, notification systems, media feeds, authentication workflows, search functionality, and scalable user interaction systems.
- Developed and deployed scalable e-commerce solutions for beauty and wellness brands including **Pavica Beauty Natural**, managing hosting infrastructure, domain routing, deployment configuration, performance optimization, payment systems and responsive storefront experiences.

- Developed plagiarism detection platform, IEMSecure (Online Plagiarism Checker software) using React, Node.js, MongoDB, FastAPI, and used **Selenium**, for **Web Scraping** and Containerized with Docker.
- Worked with NLP and DevOps teams to improve scraping accuracy and deployment workflows.
- Conducted technical interviews and mentored trainees on **MERN stack** and blockchain fundamentals.
- Worked as a Full Stack Trainer. Source code for MERN and Wamp stack training report and also taught Blockchain.

Quordnet Academy

Remote

- Built React.js frontend interfaces and **REST APIs** using Node.js, Express.js, and MongoDB.
- Implemented authentication, CRUD workflows, and collaborative frontend features.

Skills

Languages: JavaScript, TypeScript, Python, C++, Solidity**Frontend:** React, Next.js, Redux, MobX, Vue.js, Tailwind, Material UI**Backend:** FastAPI, Node.js, Express.js, Flask, Django, REST APIs, WebSockets**AI / Cloud:** LangGraph, OpenAI, Anthropic, Gemini, AWS Lambda, Azure, Docker, Kubernetes, Terraform**Databases:** PostgreSQL, MongoDB, MySQL, DynamoDB, Redis**DevOps:** Azure DevOps, CI/CD, Celery, RabbitMQ, Git, Stripe**Projects**

TechFund – Decentralized crowdfunding platform using Next.js, Moralis, and Web3; secured 2nd place among 1000+ participants at Design Heist Hackathon.

EasyJaber – Real-time logistics-driven vaccination strategy platform; ranked Top 10 among 1600+ teams at IIIT Pune Hackathon.

eShop – Full-stack MERN eCommerce platform with Stripe and PayPal integration, authentication workflows, product management, and responsive shopping experience.

Education

University of Engineering & Management, Kolkata

2019 – 2023

B.Tech in Computer Science Engineering

GPA: 9.3

Achievements

- **Design Heist Hackathon — Runner-up** — Secured 2nd place among 1000+ participants for building *TechFund*, a decentralized crowdfunding platform.
- **IIIT Pune Hackathon — Top 10 Finalist** — Ranked among Top 10 teams out of 1600+ participants for building *EasyJaber*, a real-time logistics-driven vaccination strategy platform.
- **Ureckon Technical Team Lead** — Led the web team and coordinated the coding event *Debugger*, managing technical execution and team collaboration.
